

IT SECURITY

Protect your business; don't get caught out

Let us manage your IT security, so you don't have to

Information and network security needs to be a key consideration for any business these days. Virus attacks, hackers, spam and malicious emails are a major headache for any business; big or small.

As the methods of attack have become more complex, so have the measures needed to manage these threats. That's why so many companies turn to us for professional, comprehensive protection from IT security risks.

We devise solutions that feature a range of products including: firewalls, anti-virus, web-filtering, anti-spam and VPN connections, in conjunction with the world's leading providers of security products: Kaspersky Lab, WatchGuard and ForcePoint.

Ready to be deployed via the cloud or onsite, Kaspersky Lab, WatchGuard and ForcePoint products are the ultimate in IT security.

Our team of highly qualified Technical Consultants can evaluate your current network for strengths and weaknesses and recommend the best solution for your needs and budget.

At a glance

- Weaknesses identified before they are exploited
- Business continuity with minimal disruption
- Vulnerable security areas can be prioritised
- Compliance with liability guidelines made easier
- Feel confident using the internet and email

A full product range, delivered by experts

Firewalls

Used for blocking unwanted traffic, whether it be protection from emails with very large file sizes or executable files which autorun, OGL uses firewalls from WatchGuard as the first line of defence.

Anti-virus

Kaspersky Lab anti-virus solutions help protect your network from viruses and worms. The synergy between OGL and Kaspersky Lab ensures the very best service for our customers. OGL is currently the UK's only Kaspersky Platinum Partner.

VPN

VPN is the backbone of a solid network infrastructure which connects remote users or sites securely. OGL supplies VPN configurations through a team of highly certified technical engineers. Partnering with WatchGuard, OGL supplies the latest technologies for network security.

Web filtering

WatchGuard web filtering products from OGL have revolutionised the management of web activity within businesses, ensuring a safe operating environment which optimises staff productivity.

Anti-spam

OGL uses Forcepoint (formerly known as Websense) to scan inbound and outbound email to dramatically reduce spam.
