

HOSE ASSEMBLY

Streamlining complex hose assembly processes

Maintain visibility of quotes, sales orders, pricing, components and assemblies

The hose assembly module within prof.ITplus software makes light work of creating hose assembly component lists for pneumatic and hydraulic distributors. It streamlines sales orders and quotations for the most complex hose assemblies, whilst maintaining full visibility of current stock levels and sales prices.

Entering hose assembly price information onto the system can either be done by adding a margin to the cost of the assembly or, automatically by taking into account customer specific discount regimes and net prices. The module is fully integrated with stock and purchase order processing, providing automatic allocation of available components.

At a glance

- Streamline sales orders
- Full visibility of stock levels
- Traceability of components and assemblies
- Seamless integration with the works order processing module
- Automatic inclusion of costs for linked items

Key elements of the module include the automatic inclusion of associated costs for linked items such as ferrules and swaging charges and automated purchase ordering of any low stock items to maintain stock levels.

Works order processing in prof.ITplus operates seamlessly with the hose assembly module, catering for smaller kits assembled for stock, right through to complicated multi-level bills of materials and outwork.

Full traceability and control

Traceability of components and assemblies is always a priority and the variable bill of materials ensures you can retain version control and audit trails when adjusting component specifications for one-off builds. Furthermore test and material certification together with data sheets are held as attachments and can be printed or emailed directly to the customer for rapid processing of routine paperwork.

Summary of prof.ITplus benefits:

- ✔ Save time by eradicating manual, laborious processes and replace with activity that drives your business forward
- ✔ Gain the ability to increase sales and improve profit margins across the whole business
- ✔ Allow the business to grow without the need to employ more people
- ✔ Enable a more efficient, effective and productive workforce

Learn more ... Our other products & services

One of the key strengths of OGL is that, as well as our Business Software division, we also have other divisions dedicated solely to the provision of IT Solutions and Cyber Security. Meaning we can take care of your business software requirements and

your infrastructure and security needs. We have many specialists in our IT Solutions and Cyber Security divisions who can work seamlessly alongside our Business Software Consultants to offer the full IT package.

Don't just take our word for it...

“ We wanted to have in place a system which will propel us to the next level of business and I can already see the benefits that the system will bring. ”

Metalflex, Warrington
